

CASEMENT WINDOWS

The Casement system is a classic, high-efficiency window solution valued for its simple operation, strong compression sealing, and long-term reliability.

Designed with a side-hinged configuration, the sash opens outward in a controlled manner, allowing effective natural ventilation and precise closing pressure for consistent airtight performance.

Engineered with robust profiles and multi-point hardware, the system delivers dependable daily use while supporting modern energy efficiency expectations.

Its clean, straightforward design makes it a versatile choice for projects that prioritize durability, energy performance, and a familiar architectural aesthetic.

- MADE IN EUROPE
- HIGH PERFORMANCE VINYL SYSTEMS FROM REHAU
- ROTO HARDWARE

PERFORMANCE HIGHLIGHTS

- Side-hinged opening for wide, controlled ventilation
- Compression-seal design for consistent airtight performance
- Manually inserted EPDM triple gaskets for enhanced weather sealing
- Glazing configurations up to 1 ¼ inch for improved thermal efficiency
- Smooth, reliable crank operation
- Suitable for single or multi-unit configurations
