

MASTERLINE 8 GLASS DOORS

MasterLine 8 glass doors are designed to deliver high thermal performance and reliable operation in aluminum door applications.

As part of the MasterLine 8 platform, this system combines insulation, durability, and ease of use in a solution developed for long-term performance. Its construction supports consistent behavior under varying climate conditions while maintaining a refined and minimal appearance.

With multiple design configurations available, MasterLine 8 glass doors provide flexibility for projects that require both performance and clean architectural integration.

PERFORMANCE HIGHLIGHTS

- **High-Performance Insulation:** Engineered to achieve thermal performance values as low as 0.25 Btu/hr-ft²·°F (double glazing) and 0.20 Btu/hr-ft²·°F (triple glazing), depending on glazing and system configuration.
- **Reliable Weather Resistance:** Class 4 air tightness, 8A water tightness, and C2 wind load resistance
- **Flexible Sizing:** Supports vent heights up to 3000 mm, enabling full-height door applications
- **Acoustic Comfort:** Sound insulation up to 43 dB for quieter interior environments

- MADE IN CANADA
- HIGH PERFORMANCE ALUMINUM SYSTEMS FROM REYNAERS
- SOBINCO ACCESORIES
