

# MASTERPATIO SLIDING DOORS

MasterPatio is a high-performance aluminum sliding door system designed to deliver a balanced combination of insulation, durability, and design flexibility.

Based on a lift-and-slide mechanism, the system allows large panels to move smoothly while ensuring reliable sealing when closed. Its construction supports consistent performance under demanding conditions while maintaining ease of operation.

With multiple configuration options available, MasterPatio adapts to a wide range of architectural requirements, offering a versatile sliding solution for residential and large-scale applications

- MADE IN CANADA
- HIGH PERFORMANCE ALUMINUM SYSTEMS FROM REYNAERS
- SOBINCO ACCESORIES

## PERFORMANCE HIGHLIGHTS

- **Lift-and-Slide Operation:** Ensures smooth panel movement and improved sealing performance
- **High-Performance Insulation:** Engineered to achieve high thermal performance, with values depending on glazing configuration and system design.
- **Reliable Weather Performance:** Air infiltration of 0.08 cfm/ft<sup>3</sup> and water resistance up to 12 psf
- **Large-Format Capability:** Supports vent heights up to 3600 mm, widths up to 3000 mm, and weights up to 600 kg
- **Design Flexibility:** Supports open corners, pocket systems, zero thresholds, and slim chicane configurations
- **Acoustic Performance:** Up to STC 44 dB for improved interior comfort
- **Structural Performance:** Rated AAMA Class AW, suitable for demanding conditions
