

MASTERLIGHT SKYLIGHTS

MasterLight is an aluminum skylight system designed to introduce natural light through roof applications while maintaining reliable performance and integration.

Compatible with both flat and inclined roof configurations, the system supports double and triple glazing, allowing flexibility across different project requirements. Its design enables seamless integration into the building envelope, making it suitable for both new construction and renovation.

Engineered for controlled drainage and consistent performance, MasterLight operates effectively even at low roof inclinations, supporting long-term durability in exposed conditions.

PERFORMANCE HIGHLIGHTS

- **Roof Integration Flexibility:** Compatible with flat and inclined roofs from 2° to 30°, supporting a wide range of applications
- **High Weather Performance:** Class 4 air tightness with reliable water drainage, even at low roof slopes
- **Glazing Versatility:** Supports glass thicknesses from 1 1/8 inch to 2 1/16 inch, compatible with double and triple glazing
- **Natural Light Optimization:** Designed to maximize daylight entry through roof-mounted glazing
- **Structural Configuration:** Supports single or multiple panel layouts for flexible skylight design
- **Durability Under Exposure:** Engineered to withstand demanding weather conditions, including high wind exposure
