

MASTERLINE 10 WINDOWS

MasterLine 10 is engineered for low-energy and passive building applications, delivering advanced thermal insulation within a refined aluminum window platform.

It integrates reliable weather performance and long-term durability in a system designed to perform consistently under demanding climate conditions while supporting energy-efficient building strategies.

MasterLine 10 offers clean, precise design options adaptable to a wide range of project requirements.

- MADE IN CANADA
- HIGH PERFORMANCE ALUMINUM SYSTEMS FROM REYNAERS
- SOBINCO ACCESORIES

PERFORMANCE HIGHLIGHTS

- **Passive House Certified Performance:** Certified by the Passive House Institute. Engineered to achieve thermal performance values as low as $U_w = 0.14$ Btu/hr-ft²-°F (triple glazing), depending on glazing and system configuration.

- **Robust Weather Resistance:** Tested to 4 / E900 / C4 classifications for air permeability, water tightness, and wind load resistance
- **Design Versatility:** Available in Functional, Deco, Hidden Vent, and Renaissance design variants
- **Large-Format Capability:** Supports vent heights up to 2800 mm and weights up to 200 kg, enabling flexible glazing configurations
- **Acoustic Performance:** Up to R_w 46 dB for improved interior comfort
- **Smart personalization:** includes motorization, concealed hinges, glass corners, and DigiTrace digital passport
- **Sustainable and secure:** Built for long-term performance with burglarproof options
