

PARALLINE CLADDING

The Paralline aluminium façade cladding system extends the architectural language of a building envelope through precision-engineered aluminium profiles.

Designed to combine contemporary aesthetics with sustainable performance, Paralline enables architects and builders to create distinctive façades using a refined and limited set of profiles. The system integrates seamlessly with windows, doors, and glazed areas, allowing cohesive façade compositions across residential and mixed-use projects.

Available in a wide range of configurations, orientations, and high-quality powder-coated or anodised finishes.

- MADE IN CANADA
- HIGH PERFORMANCE ALUMINUM SYSTEMS FROM REYNAERS

PERFORMANCE HIGHLIGHTS

- **Horizontal and Vertical Applications:** Compatible with both horizontal and vertical façade layouts, allowing flexible architectural design.
- **Integrated System Compatibility:** Designed to integrate seamlessly with aluminum window and door systems for a cohesive façade solution.
- **Pre-Assembled Frame Options:** Pre-assembled frame configurations simplify installation and improve on-site efficiency.
- **Flexible Profile Depth Options:** Multiple profile depth variations allow architects to create texture, rhythm, and visual depth in façade designs.
- **Long Term Durability:** Engineered aluminum profiles ensure long-term durability and resistance to weather exposure.
